Commissioner, Metropolitan Police

20<sup>th</sup> February 2024

**Dear Sir Mark,**

I am contacting you as a serving Member of Parliament. I seek an urgent meeting with you and senior Metropolitan Police Detectives to discuss some very serious and concerning issues that have been brought to my attention regarding the Coronavirus pandemic response and the vaccination programme.

This is a matter of paramount importance for the well-being and safety of the British public. I and others deem this to be a national emergency having identified a litany of failures and cover-ups that can no longer be ignored. The usual routes via the standards committee, government departments, regulators and Civil Service have all been dismissed or ignored.

Contact with the independent Covid Inquiry team was made and they have clearly stated their role is not to determine innocence or guilt. They further added if criminality is suspected to report these allegations to the police. It is for these very reasons this is now a matter for the Police.

Very serious criminal offences to name but a few, Misconduct in Public Office, Misfeasance in Public Office. Gross Negligent Manslaughter, Corporate Manslaughter, Fraud, Murder, Manslaughter and Grievous Bodily Harm have been identified along with conspiracy to commit and aiding and abetting the aforementioned crimes.

It would be prudent to have a conference room big enough to facilitate at least twenty people because the following named men and women will also attend to provide evidence in their fields of expertise that fully supports the assertions being made.
